

ENGİN DENİZ ÜÇGÜN

ELECTRICAL & ELECTRONICS ENGINEERING STUDENT

AIM

After years of questioning myself and my desires I realized nothing makes me happier than helping people. I am an artist and an engineering student so I can think both analytically and emotionally. I want to use these abilities of mine for a good cause.

SKILLS

Problem Solving
Teamwork
Social Media
C1 English speaking & writing
Graphic Design
HTML & CSS
C, Java & Python
Office programs
Drums, Violin, Guitar
Sketching and Digital art

EXPERIENCE

CODING • SOCIAL MEDIA • ELECTRONICS • ECONOMICS & CRYPTO

I've started learning coding in 3rd grade with Small Basic by microsoft and Scratch. My first projects were mainly simple mini games. Later I started getting into HTML and CSS in Highschool. After getting into college, I took Java and Python courses.

Last year (2022) I started vlogging on YouTube. After couple months my channel started growing. As of right now I've accumulated over 45.000 subscribers. I like making digital diary videos and get in touch with people, teach them and learn from them. One of the reasons I'm making videos is because I want to have an effect on peoples lives.

Since I was a little kid, I've always been into electronics. I used to fix up broken electronics in the household or just break stuff apart to see how they operate. Couple years ago, I built my computer and keyboard by myself. I always like to learn and practice with electronics.

I've been into Economics since 2019. I learned a lot about economics from the very famous books rich dad poor dad by Robert Kiyosaki and the Intelligent Investor by Benjamin Graham. I bought my first stock in 2020. I'm also paying my taxes because I'm earning money from YouTube.

I also got interested in Crypto in year 2020. I did Ethereum mining for 3 months. In 2021 I started buying and selling crypto.

EDUCATION

Özyeğin University Electrical & Electronical Engineering 2020-present
Bilfen Antalya Fen Highschool 2016-2020
TED Antalya College 2008-2016
